SUMMARY

AI/ML Engineering student, B.Tech in CSE (AI & ML), skilled in developing AI-powered applications and automating intelligent workflows. Proficient in Python, Machine Learning, Generative AI, AI agents, and Large Language Models (LLMs), with hands-on experience in Prompt Engineering, REST API integration, and automation tools including n8n, Power Automate, Make, and Zapier for business process automation.

SKILLS

Python Programming, Generative AI, Machine Learning, Prompt Engineering, Large Language Models (LLMs), REST APIs, JSON, SQL Fundamentals, Git/GitHub, Data Structures & Algorithms, AI Agents, n8n, Power Automate, Make, Zapier, Next.js, Express.js, React, C++, C, JavaScript, Node.js, MongoDB, Hostinger, CSS, HTML

PROJECTS

Researcher

An agentic AI-powered research automation platform that streamlines problem analysis, literature review, and solution generation using multi-phase LLM workflows.

React, Node.js, MongoDB(Vector), n8n, arxiv API, Github API, Google Search API, Gemini/OpenAI API

- Developed an agentic Generative AI platform for research automation, utilizing multi-phase LLM workflows for autonomous problem analysis.
- Orchestrated intelligent workflows using n8n for seamless API integrations with arxiv, GitHub, Google Search, and cloud services.
- Accelerated research time from weeks to under an hour, automating repetitive tasks through AI pipelines for business process automation.

Chatbot and Management Application

A full-stack web application featuring a knowledge-aware AI chatbot platform for organizations to deploy private, interactive AI assistants.

React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, OpenAI API, Google Gemini API, Retrieval-Augmented Generation (RAG), JWT, GitHub, REST API

- Developed a Generative AI chatbot utilizing Retrieval-Augmented Generation (RAG) to transform organizational documents into an interactive AI-powered application.
- Constructed a full-stack web application, integrating OpenAI and Google Gemini REST APIs for public chat and administrative control panel functionality.
- Delivered a production-ready AI-powered application for private deployment, transforming static knowledge into an interactive AI agent.

HackHub

An AI-powered MERN-stack platform aggregating, de-duplicating, and normalizing hackathons from multiple sources for clear, trustworthy descriptions and personalized recommendations.

React, JavaScript (JSX), CSS, Node.js, Express.js, MongoDB, bcrypt.js, Google Gemini API, Devpost, Devfolio, Unstop

- Implemented Generative AI applications leveraging Google Gemini LLM and Prompt Engineering to transform raw hackathon listings into clear descriptions and quality scores, automating repetitive tasks.
- Engineered intelligent workflows for personalized hackathon recommendations based on user skills, integrating an AI agent for chatbot development on event pages.
- Built an admin dashboard to monitor scraping and analysis jobs, facilitating workflow automation and fine-tuning quality thresholds for platform scalability.

HR Analytics

An AI-powered full-stack platform transforming raw employee data into interactive dashboards for natural language HR analytics.

Node.js, Express, MongoDB, React, CSS, Axios, Recharts, Lucide React, Google Gemini API, OpenAI API, Multer, csvtojson

- Implemented Generative AI, leveraging Google Gemini 2.5 Flash (LLM), to translate natural language queries into MongoDB aggregation pipelines.
- Developed an interactive analytics dashboard, integrating dynamic Recharts and offering twenty-five pre-built analytical questions for HR.
- Automated complex HR data analysis, providing non-technical professionals with valuable insights without requiring SQL knowledge.

Whats-App Automation

Developed an AI-powered customer engagement platform, leveraging Generative AI and LLMs to automate WhatsApp interactions and provide an intelligent virtual assistant for businesses.

Node.js, Express.js, MongoDB, Socket.IO, WhatsApp Web.js, Puppeteer, Chromium, Google Gemini API, OpenAI Embeddings API, React, Tailwind CSS, Git

- Developed an AI-powered WhatsApp assistant using Google Gemini LLM via API integrations, applying Prompt Engineering for generative responses and automated chatbot development.
- Integrated OpenAI Embeddings API to build a private knowledge base, ensuring accurate, on-brand LLM responses and enabling intelligent workflow automation for business processes.
- Developed a visual dashboard for non-technical users, enabling control and monitoring of the AI agent to enhance business process automation and track lead engagement.

WORK EXPERIENCE

Research Intern

AS&H Department PCCOE | June 2025 – Nov 2025

- Developed an AI-powered Fuzzy Logic admission prediction model using Python, achieving 95% accuracy.
- Implemented fuzzy inference and rule-based decision systems, contributing to intelligent workflows with real-world datasets.
- Presented research findings at the ICRTMS 2025 conference, demonstrating strong communication skills and contributing to academic discourse.

Software Developer Intern

CampusDekho.ai | May 2025 – Jul 2025

- Developed and deployed full-stack web products, leveraging HTML, CSS, JavaScript, Node.js, and database technologies for robust API integrations.
- Designed and implemented intelligent workflows for MHT-CET percentile and college predictor tools, supporting student decision-making.
- Managed the entire product lifecycle, from design and testing to deployment, achieving sales of over 500 preference lists.

ACHIEVEMENTS

- Achieved dual victories in the INNS Nurathon Competition, applying AI and Machine Learning to develop innovative Natural Language Processing solutions.
- Secured first place in the national IEEE Innoquest 2025 Hackathon, developing innovative AI and automation solutions for real-world problems.
- Achieved finalist status in the national IEEE TechSangam 2025 Hackathon, developing AI and automation solutions for complex challenges.

EDUCATION

- Pursuing B.Tech in CSE (AI & ML), Pimpri Chinchwad College of Engineering, 2023–2027; gaining expertise in AI technologies and Machine Learning; CGPA: 6.95.
- 12th Grade, Shramik Junior College, 2022, 66%; MHT-CET 96.14%, JEE-MAIN 96.08%, JEE-ADVANCE Rank 11253.
- 10th Grade, M.R.D. Malpani Vidyalaya, Sangamner, 2020, 92%.
