SUMMARY

Aspiring AI/ML Engineer (B.Tech CSE-AI & ML) proficient in Python, Generative AI, Machine Learning, and LLMs. Applies Prompt Engineering, REST APIs, and SQL fundamentals to develop AI-powered applications, workflow automation, and API integrations, demonstrated through hackathon wins and an internship at CampusDekho.ai.

SKILLS

Generative AI, Python Programming, Prompt Engineering, Machine Learning, REST APIs & JSON, Git/GitHub, Large Language Models (LLMs), Workflow Automation, AI Agents, Data Structures & Algorithms, SQL Fundamentals (MySQL, PostgreSQL), Automation Tools (n8n), Problem-Solving, Analytical Thinking, Communication Skills, Next.js, Express.js, React, Hostinger, C++, C, JavaScript, CSS, HTML, Node.js, MongoDB

PROJECTS

Researcher

Engineered an agentic Generative AI platform for research automation, autonomously performing problem analysis and solution generation using multi-phase LLM-driven intelligent workflows, optimizing business process automation.

React, Node.js, MongoDB(Vector), n8n, arxiv API, Github API, Google Search API, Gemini/OpenAI API

- Engineered an agentic Generative AI application for research automation, utilizing multi-phase LLM-driven intelligent workflows for autonomous problem analysis and solution generation, optimizing business process automation.
- Orchestrated AI pipelines using n8n for intelligent workflow automation, integrating REST APIs (arxiv, GitHub) and cloud services with JSON data, enhancing business process automation.
- Reduced research time from weeks to under an hour through parallel AI pipelines, demonstrating effective AI-powered intelligent workflows and problem-solving, enhancing business process automation.

Chatbot and Management Application

Developed an AI-powered full-stack application for chatbot development, delivering a private, knowledge-aware chatbot for instant, accurate answers.

React, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, OpenAI API, Google Gemini API, Retrieval-Augmented Generation (RAG), JWT, GitHub, REST API

- Engineered Generative AI chatbot development using a custom RAG system, integrating LLMs via OpenAI and Google Gemini APIs.
- Designed and built a full-stack management application using Node.js and MongoDB for chatbot configuration and knowledge base administration.
- Delivered a production-ready AI assistant through chatbot development, transforming static knowledge into interactive conversational experiences.

HR Analytics

Developed an AI-powered full-stack MERN application for HR analytics, automating workflow to transform employee data into an interactive dashboard using Generative AI.

Node.js, Express, MongoDB, React, CSS, Axios, Recharts, Lucide React, Google Gemini API, OpenAI API, Multer, csvtojson

- Engineered Generative AI interface using Google Gemini 2.5 Flash API, translating natural language HR queries into MongoDB aggregation pipelines.
- Developed interactive analytics dashboard with React and Recharts, featuring twenty-five pre-built questions and AI-generated narrative insights.
- Automated HR data analysis business process, making insights accessible to non-technical professionals without SQL or programming expertise.

HackHub

Developed an AI-powered MERN-stack platform leveraging Generative AI and LLMs for workflow automation, aggregating and normalizing hackathons via API integrations.

React, JavaScript (JSX), CSS, Node.js, Express.js, MongoDB, bcrypt.js, Google Gemini API, Devpost, Devfolio, Unstop

- Engineered an AI-powered MERN-stack platform, leveraging Generative AI and LLMs via Google Gemini API for hackathon aggregation and normalization.
- Integrated Google Gemini API, utilizing Prompt Engineering to power AI agents for content refinement and chatbot development.
- Provided personalized recommendations using basic Machine Learning concepts, enhancing user engagement and satisfaction.

WORK EXPERIENCE

Research Intern

AS&H Department PCCOE | June 2025 – Nov 2025

- Developed a Fuzzy Logic Machine Learning model in Python for admission prediction, achieving 95% accuracy.
- Implemented fuzzy inference and rule-based decision systems, applying algorithms to process real-world datasets.
- Presented research findings at the ICRTMS 2025 conference, demonstrating strong communication skills.

Software Developer Intern

CampusDekho.ai | May 2025 – Jul 2025

- Built and deployed full-stack web products, integrating REST APIs with HTML, CSS, JavaScript, Node.js, and databases.
- Developed AI-powered MHT-CET percentile, college predictor, and preference list tools to aid student decision-making.
- Managed the end-to-end product lifecycle, from design to deployment, achieving 500+ sales of preference lists.

ACHIEVEMENTS

- Secured victory at IEEE Innoquest 2025 Hackathon, demonstrating problem-solving and developing AI-powered applications.
- Awarded two-time winner at INNS Neurothon, developing AI-powered applications using neural networks and Natural Language Processing.
- Attained finalist status at IEEE TechSangam 2025 Hackathon, focusing on AI and data-driven solutions for complex problems.

EDUCATION

- Pursuing B.Tech, CSE (AI & ML), Pimpri Chinchwad College of Engineering (2023–2027), developing skills in Python, Data Structures, and Machine Learning; CGPA: 6.95.
- Achieved 66% in 12th Grade at Shramik Junior College in 2022, demonstrating foundational academic capabilities.
- Secured 92% in 10th Grade at M.R.D. Malpani Vidyalaya, Sangamner (2020), demonstrating strong academic performance.
